

ClassLink | Google SSO Integration

Integrating your ccsmail.org account to ClassLink is very easy and allows you one-click sign on, with Chromebooks or when you are signed into Chrome on PC/Mac.

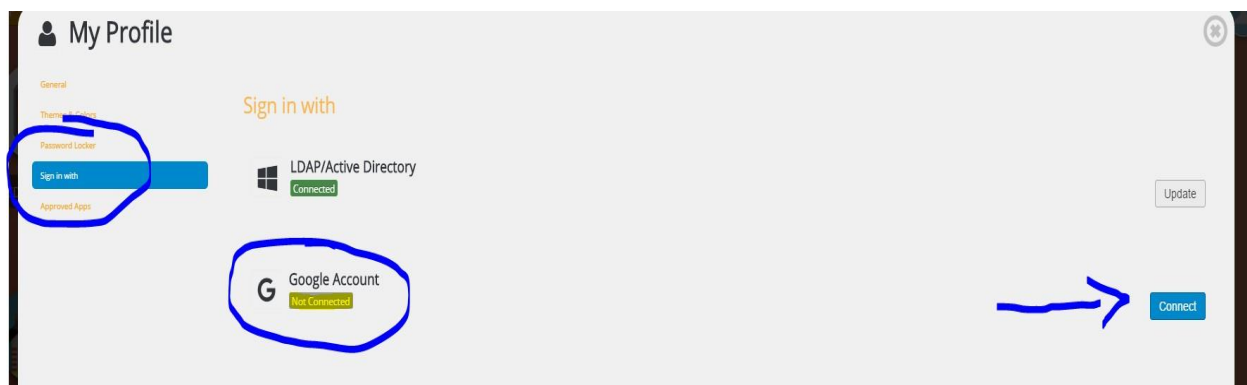

Logon to ClassLink using your network username and global password.

This is the same credentials you use to sign into your Chromebook or AD Computer.

Click the avatar menu in the upper right corner of ClassLink and click “My Profile”

Click “Sign in with” then “Connect” next to Google Account

Sign in with your @ccsmail.org email account (no other domain will work).

You are all set! Next time you can click the “Sign in with Google” button instead of entering your AD Account! Please note, this will link both your AD and Google Accounts together, so you can use either/or!
